## Market commentary

Global equities extended January's strong gains into February, rising an additional 3.8% to bring the year-to-date total return to 11.5%. Positive returns were broad based across geographies as Europe's Euro Stoxx 50 index gained 4.4% and the S&P 500 rose 3.2%. A resolution to the US government shutdown, better than expected corporate earnings, and signs of positive negotiations between the US and China on trade have acted as a tailwind to global equity markets. The release of the minutes from the Federal Reserve's January policy meeting highlighted that the central bank acknowledged the global macro slowdown and indicated that it will be "patient" with respect to future interest rate increases in 2019. In Europe, the perception of the risk of a hard Brexit has diminished, contributing to the strong European equity performance in the month.
