Fund performance

The Fund posted a positive return in June. Outperformance of the underlying global dividend equity exposure during the month was driven by a balanced contribution of sector allocation and stock selection. Top performing equity holdings included global beauty group L’Oréal (+9%), Apple (+14%), and Swiss specialty chemicals company Sika (+11%). Gold rose a further 1.5% over the month (now +16% YTD) while the Fund’s government and corporate bond holdings also contributed positively to returns. The Fund’s downside protection strategy (index put options) was a drag on performance given the backdrop of global equity market strength.

## Market commentary

June finished a very strong second quarter for global equity markets – the MSCI World Index gained 1.7% in euro terms over the month. Fiscal and monetary support were key drivers behind the continued rebound. The ECB raised its pandemic bond buying program by €600bn to €1.35tn and extended the program until June 2021. The Fed reiterated its ultra-accommodative policy for the foreseeable future, with interest rates unlikely to rise before the end of 2022. A significant bounce back in monthly economic data, albeit from depressed levels, also helped underpin sentiment. Conversely, cases of Covid-19 continued to increase globally, most notably in the US. Within equity markets, Technology and Consumer Discretionary sectors outperformed while Utilities and Healthcare, both traditionally defensive sectors, lagged the broader market. Gold continued its steady push higher, gaining an additional 1.5% in June. In US politics, Joe Biden took a commanding lead in the US presidential election polls.
