Goodbody Dividend Income Balanced Fund

Class E EUR Accumulation Shares ISIN: IE00BZ1NPN02

A sub-fund of Goodbody Funds ICAV

This Fund is managed by KBA Consulting Management Limited (the "Manager")

Goodbody is the Investment Manager of the Fund

Objectives and investment policy

- The Goodbody Dividend Income Balanced Fund ("the Fund") invests primarily in a diversified portfolio of predominantly dividend paying global equity securities which generate stable income. In order for the Fund to deliver stable and consistent growth consistent with its objective, the investment manager may reduce exposure to equities and increase exposure to money market instruments and fixed income securities, based on its view of the outlook for global equity markets.
- The Fund may invest up to 100% of its Net Asset Value in equities and may typically invest up to 70% of its Net Asset Value in equities.
- The Fund may also invest in options (a contract which gives the right, but not the obligation, to buy/sell an underlying asset at a specified price on or before a specified date) and futures (a contract to buy/sell an asset for a price agreed today with delivery and payment occurring at a future date). The investment manager will seek to generate additional income for the Fund by writing options on some of the underlying equity holdings in the Fund. The investment manager will aim to reduce the volatility of the overall Fund by purchasing downside protection via index options on some of the major global equity indices, for example, S&P 500, EuroStoxx 50 and Topix.
- The aggregate amount that may be invested in money market instruments, cash, cash deposits and fixed income securities will not exceed 50% of the Net Asset Value of the Fund dependant on prevailing market conditions and where the investment manager considers it in the best interests of the Fund to do so.
- The Fund may invest in exchange traded funds (ETFs) (a marketable security that tracks an index, a commodity, bonds, or a basket of assets like an index fund). Any investment in such instruments will provide indirect exposure to global equity and fixed income markets. Investment in ETFs will be limited to 10% of the Net Assets of the Fund.
- The Fund may invest in fixed income securities including government and corporate bonds. Such instruments will be rated investment grade or higher by industry recognised ratings agencies. The Fund may also invest in Global and American depositary receipts for the purpose of gaining exposure to the underlying equity securities. The Fund may invest up to a maximum of 20% of its Net Asset Value in emerging markets.
- The Fund is actively managed. The investment manager has full discretion over the composition of its portfolio subject to the stated investment objectives and policies and it does not track or benchmark its performance against an index.
- All income and gains generated by the Class E EUR Accumulation Class will be reinvested. No dividends will be paid for the Accumulation Classes. All income and gains generated by the Distributing Classes may be distributed.
- On demand, you can buy and sell Shares in the Fund on any Business Day.
- The Class E EUR Accumulation Shares are denominated in Euro ("Euro").
- The Fund is appropriate for investors with a long term investment horizon.
- Please refer to the Prospectus and Supplement for more detailed information.

Risk and reward profile

| | | | | | | |
|---------------------------|---|---|----------------------------|---|---|---|
| • Lower risk | | | Higher risk • | | | |
| • Typically lower rewards | | | Typically higher • rewards | | | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

- The indicator above illustrates the position of this Fund on a standard risk / reward category scale.
- The risk and reward indicator is based on historical data and may not be a reliable indication for the future.
- The Fund is in category 4 because of the medium range and frequency of price movements of the underlying investments the Fund invests in.
- This indicator is not guaranteed and may change over time. The lowest category does not mean that a class is risk free.
- Your initial investment is not guaranteed.
- In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by the following:
 - The Fund's investments are subject to market fluctuations, so they can fall as well as rise in value.
 - The Fund's investments may be in currencies other than Euro. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
 - The Fund's assets may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions in foreign investment and the movement of money from one country to another, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.
 - The Fund can invest in financial derivative instruments. These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.
- Please refer to the Prospectus and Supplement for more detailed information.
