Goodbody Dividend Income Cautious Fund - GDI 3

- Dividend equity outperformance during a challenging month
- Index put options rise in value as equity markets fall

Fund performance

The Fund's global dividend equity holdings outperformed the broader world equity market in June. Stock selection was the key driver of relative equity performance with top performing holdings including US discount retailer Dollar General (+14%), Costco Wholesale (+5%) and healthcare company ResMed (+6%). Bonds have offered little diversification benefit to multi-asset Funds YTD and the Fund's government, and corporate bond holdings declined further in value over the period given the backdrop of rising bond yields globally. On a positive note - the Fund's downside risk management strategy (index put options) helped to somewhat offset equity weakness.

Market commentary

June was a difficult month for equities with the MSCI World Index declining by 6.4% in euro terms. The S&P 500 declined by 8.3% over the month, leading it to post its worst first half of the year in more than 50 years. Growing recessionary fears were a key driver behind the drop in June. Several economic data points, including a sharp decline in PMI readings and consumer confidence, pointed to a continued deterioration in growth. The Fed increased interest rates by 0.75%, its largest single hike since 1994. Meanwhile, the ECB confirmed its intention to raise the deposit rate by 0.25% in July and left the door open to a larger increase in September. Fixed income markets were volatile again during the month. The US 10-year yield ended the month at 3.0%, having been close to reaching 3.5% intramonth. Meanwhile, the German 10 year ended the month at 1.3%, having moved above 1.7% intramonth. Elsewhere, commodity prices came under pressure, driven by recessionary fears. The price of a barrel of oil declined by nearly 7%.
